

SCIENCE OF LEARNING ACCELERATOR

Are you a teacher or leader who has implemented explicit teaching and science of learning techniques in your school?

We are looking for changemakers who are already on a journey transforming learning in their classrooms, schools and systems. If this sounds like you, read on.

Ollie Lovell, Dr. Pamela Snow, Dr. Lorraine Hammond, Jenny Donovan, Toni Hatten Roberts, Reid Smith, Ross Fox, Elena Douglas and other global experts in school and system improvement guide you through a two day experience in which you will learn the process of implementing improvements in teaching and learning.

This one time only professional learning event will accelerate your knowledge and skills in making and sustaining evidence-based change. Every participant will be supported to develop their own action plan to implement in their school. Scholarships available.

19-20 May 2022

Crowther Centre, Melbourne
